## Summary

Many townships face the issue of where to allow for or encourage commercial growth without encouraging sprawl. Cross Village Township is fortunate to have a “downtown” area to accommodate commercial growth. The survey findings, clearly indicated that the majority of the residents are not interested in promoting growth of the Township. However, many in the Township recognize growth can not be stopped and planned growth is preferable to unplanned growth. It is upon this premise that the downtown study component for this Cross Village Master Plan was prepared. The intent is not to encourage growth, but rather to develop a framework for handling and directing growth as the need arises.
